THE JOHN PAWLING COLLECTION

U. S. Half Cents

The Pawling Collection of Half Cents, presented herewith, while not noteworthy for superb preservation, does include some of the rarest varieties in the early dates, and some top-grade coins of more common die.

With this offering, we introduce a new feature. The varieties are all attributed to Gilbert and to the forthcoming standard work on the series. Combined with the latter are rarity ratings based on the Sheldon scale, in many instances quite different from Gilbert's, and a tentative schedule of dollar values, designed to make this series more or less uniform with both early and late date Cents. (An initial listing of rarity ratings and dollar values for the late date Large Cents was included in our thirty-eighth catalog, that of the 1952 A.N.A. Convention sale.)

Collectors are advised to retain the data supplied with these Half Cents, as it all will integrate immediately with the new reference when it appears.

- 73 **1793.** Gilbert 1; Crosby 1-A; **Breen 2: 1-B (R-4 — \$2.25).** Bust left; the first year of issue. Uncirculated-60. A perfectly centered and well struck coin, with a glossy, light brown surface showing faint traces of original lustre. The planchet was slightly clipped, on the right hand side, at the Mint, but this does not even interfere with the border beading to any marked degree, nor does it materially impair the appearance of the piece. This variety is much scarcer than the G-2 in any condition, and is extremely rare in Mint State. The specimen here offered is one of about four in that condition known to us. Even the famed Eliasberg collection only has an Extremely Fine example.
Plate II. (\$135.00)
- 74 **1793.** G-4; C 2-C; **B 4: 2-C (R-4 — \$2.75).** Period after legend. Just about Ex. Fine-40. Like the last, this piece is well centered and struck. Dark brown color, touched with steel. A weakness at HALF CENT, upon the reverse, is a result of die sinking, and not of wear. The flan was apparently slightly defective, and we note a few microscopic reverse nicks. The reverse die, on this specimen, is not broken at the rim, and as a variety, it is the scarcest of the 1793's, by a small margin. None are yet known to us in full Mint State.
Plate II. (\$100.00)
- 75 **1793.** G-4; B-4. Another, like the last, but the very scarce sub-variety with a rim break over FAME, upon the reverse. The obverse die is perfect, as on all but two or three specimens. Good-4. This piece was purchased as Very Good, the obverse being comparatively strong, and the date fully clear and legible. Unfortunately, the reverse is well worn, and the words HALF CENT are not now visible due to advanced die sinking. A few minute corrosion spots are apparent, mainly upon the reverse and the edge.
- 76 **1794.** G-9; **B 5: 1-A (R-3 — \$1.50).** Good-5, the surface uniformly rough and corroded. G-4; **B 10: 4-E (R-4 — \$1.75).** Very Good-7. A sharp coin, but with two or three edge bruises, a light obverse scratch, and a small area of pitting in front of the bust upon the obverse. G-1; **B 13: 5-B (R-3 — \$1.50).** The rare sub-variety from a perfect obverse die. Very Good-7. A comparatively clean coin, showing only a few minor defects, and decided wear at the base of the reverse. Interesting examples, showing the Gynandroid head with old style or pointed 9, the regular head, and the high relief head. A good start for either a type or variety collection. 3 Pcs.
- 77 **1794.** G-4; B 10. Very Fair and Good, the last with a few obverse pit marks, and one or two other defects. Three varieties, all with slightly varying states of the badly injured obverse die. 3 Pcs.
- 78 **1795.** G-1; **B 14: 1-A (R-3 — \$2.00).** Lettered edge; pole to cap; no punctuation in date. Fine-12. A dark brown color, and with a slightly rough surface upon both sides. This coin is from the very rare die state with a chip out of the obverse die above B in LIBERTY. Only 25,600 pieces were struck, which makes this type somewhat scarcer than the Chain Cent of 1793. Decidedly underrated.
(\$25.00)
- 79 **1795.** G-1; B 14. Another. This specimen would be a Fine-15, but the reverse field is lightly scratched, and there are slight spots of green corrosion, particularly upon the obverse. It is sharper than the preceding, and hardly as bad as the description implies.
(\$25.00)

- 80 1795. G-1; B 14. Still another. The obverse is strictly Good, but the reverse is well worn, and the words HALF CENT almost obliterated. In spite of the usual defects, this piece is a good space filler.
- 81 1795. G-1; B 14. Similar to the foregoing, but **struck upon a thin planchet weighing only 77.1 grains.** (Standard weight, 104 grains.) The obverse is Good, but the reverse is decidedly weak in the center, most of HALF CENT being gone, and there are two or three small pit marks at the lower left part of the wreath, plus one towards the middle. A well worn piece, struck well off-center, but the first we have seen, and believed unique. Worth a good price.
- While the above piece is highly unusual, there is an analogous phenomenon in the Large Cents, a Sheldon 76a struck on a thin planchet, but with a lettered edge. It could be assumed that this was one of the first Half Cents struck on Dec. 28, 1795, after the Presidential order reducing the weight had become effective. However, such an explanation fails to account for the Pawling coin, for two reasons. First, Obverse 1 was discarded prior to Dec. 1, 1795, and before the thin, or 84 grain standard had been suggested. The Presidential order interrupted the coinage of G-3's, and not G-1's. Second, this specimen is too light for even the thin planchet standard. The flan is too thin for proper edge lettering, just as it regularly is on the 1797 G-1. If a coining accident, which we doubt, it was made at a time when Mint authorities were quite conscientious about the amount of copper they put into their coins.
- 82 1795. G-4; B 17: **2-C (R-4 — \$1.25).** Plain edge; pole to cap; punctuated date. Fine-15. HALF CENT, upon the reverse, is hardly visible, due to the sinking of the die within the wreath. A clean little coin, in spite of the usual minor defects which appear mainly upon the reverse. (\$18.50)
- 83 1795. G-4; B 17. Another. This example (of which we have seen no duplicate) is distinguished by having (1) a double profile; and (2) plain traces of overstriking on another G-4. The words HALF CENT and olive branch are visible upon the head; there is a double border on the obverse, and we note indications of a profile and Liberty cap upon the reverse. Abt. Fine-12. Few slight signs of mishandling. Possibly unique. (\$20.00)
- 84 1795. G-6; B 18b: **3-C (R-6 — \$4.00).** Plain edge; without pole. Struck upon a thick planchet weighing 111.7 grains. Very Fair. Extremely rare, but five or six specimens known. Also, 1795. G-4; B 17 and three examples of G-5; B 19: **3-D (R-3 — \$1.00).** Like the first, all with plain edges. Very Fair to Good. One is somewhat pitted, and another appears tooled. 5 Pcs.
- 85 1797. G-2; B 22c: **1-A (R-6 — \$3.50).** Low head with plain edge. Very Good-10. Dark steel color. Weak, as commonly found, at the upper right part of the reverse. This is the same die variety that usually comes with a lettered edge, and according to some authorities, is rarer than the G-1. A clean and desirable specimen of a real rarity. (\$35.00)
- 86 1797. G-2; B 22c. Another. VG-8. Obverse with break from chin to border, and starting to bulge at head. The reverse shows an early stage of the (rare) break through E in UNITED to wreath, LF and beyond. While the obverse is particularly clean and desirable, the reverse is well worn about the borders, and displays two light and old scratches at the right. (\$27.50)
- 87 1797. G-3; B 24: **3-B (R-4 — \$1.00).** High head with plain edge. Very Good-10, but defective. There are several tiny pit marks, mostly upon the reverse, and one or two edge bruises upon both sides. (\$8.50)
- 88 1797. G-3; B 24 and two specimens of G-4; B 23: **2-B (R-3 — .80).** Poor (2) and Abt. Good, the former being corroded and with an obverse cut. The Good piece shows signs of roughness, but was called V. Good by the former owner. Also, 1800. Good (2) and V. Good, one of the first and the last rather mis-handled. 6 Pcs.
- 89 1800. G-1; B 25 (R-2 — .35). Only one variety of this date. EF-45. This coin has an attractive, lustrous surface, but appears to be very lightly scratched, particularly upon the obverse. (\$15.00)
- 90 1802. G-1; B 27: **1-B (R-4 — \$3.00).** Strictly VG-10. A Half Cent that is unusually sharp and clean, particularly upon the well struck reverse. There is a light and unimportant scratch in the left obverse field, and one or two microscopic flaws, but this example is decidedly above average. We have seen equal pieces, and even inferior ones, sold as Fine. (\$30.00)
- 91 1802. G-1; B 27. Another. Very Good-8. In spite of several light obverse scratches, and a few other slight defects, this piece is above average, but hardly the equal of the last. In great demand. (\$25.00)
- 92 1802. G-1; B 27. Still another. A strong Good-5. Mostly sharp, but HALF CENT hardly visible upon the reverse. Superior to those usually offered. (\$15.00)

- 93 **1803.** G-2; **B 29: 1-B (R-2 — .25)** and G-3; **B 31: 2-D (R-2 — .25)**. Abt. VG-7. Also, 1800. Very Fine-35 and Abt. VF-20, the second with a light obverse scratch, and other signs of mishandling, mainly upon the obverse. 4 Pcs.
- 94 **1804.** G-10; **B 33: 2-B (R-7 — \$2.00)**. The low 4. This rarity would be a strong Fine-12 coin; but it has a black incrustation upon both sides, as well as a few small pit marks, mainly upon the reverse. It is difficult to obtain reliable data on the number of G-10's extant. We have seen five or six, and heard of three others, almost all of which are well worn. The Alvord specimen was only Very Good and sold for \$7.75 in 1924; far above what Uncirculated 1804's of common die realized in the same sale. No recent records. Ex. rare. (\$20.00)
- 95 **1804.** G-11; **B 34: 3-B (R-7 — \$2.50)**. Spiked chin, the second rarest variety with this obverse, and the second rarest variety of 1804. The reverse, as always, is cracked as Gilbert describes under G-10. Very Good-10, but slightly bruised upon the right edge, on both sides. All but three of the eight known specimens are in worn condition. This is one of the better ones, but has been cleaned upon the reverse, evidently to make certain of the attribution. We sold the second finest known example in the 1952 A.N.A. Convention sale for \$21.00. (\$22.50)
- 96 **1804.** G-6; **B 32: 1-A (R-5 — .30)** VG-10, G-8; **B 36: 3-D (R-3 — .20)** perfect (rare) and broken reverse, VG-8 and F-12, G-7; **B 37: 3-E (R-2 — .15)** VF-30, G-5; **B 38: 4-E (R-2 — .15)** F-15, G-4; **B 39: 5-E (R-2 — .15)** unusual double profile, Good-6, G-3; **B 40: 5-F (R-2 — .15)** Good-6, and G-2; **B 41: 6-F (R-1 — .12½)** EF-45. The remainder of the collection of 1804's, with but one exception. While two or three show handling defects, this is an unusual and desirable lot of different varieties. 8 Pcs.
- 97 **1805.** G-2; **B 45: 2-B (R-2 — .20)** and G-1; **B 46: 3-C (R-2 — .20)**. The "Large 5; Stems to wreath" and "Small 5; Stemless wreath," the two varieties usually found. VF-20 and F-15, the last with a serious planchet defect on the right edge. Also, 1804. G-1; **B 42: 6-G (R-5 — .75)**. Plain 4; Stems to wreath. VG-8, but the edge slightly bruised in two places. A rare and popular "type" coin, worth a good price. 3 Pcs.
- 98 **1806.** G-1; **B 47: 1-A (R-1 — .15)** and G-3; **B 49: 3-C (R-2 — .15)**. The "Small 6; Stemless" and "Large 6; Stems to wreath." Fine-15 and Uncirculated-65. The last is full mint red, but displays slight spotting, and some signs of tarnish. Nice coins for the type collector. 2 Pcs.
- 99 **1806.** G-2; **B 48: 2-B (R-6 — \$1.00)**. Small 6; Stems to wreath. Abt. Fine-15. Dark brown color. A remarkably clean example of an uncommonly rare Half Cent. Our basal value is conservative on this popular type coin which lists in the 1953 Standard Catalog in Fine at \$25.00. In great demand. (\$25.00)
- 100 **1806.** G-2; **B 48.** Another, like the last. Very Good-10. Steel color. Almost as clean as the preceding, but hardly as sharp. Considering the fact that only a dozen or so examples of this variety are known to exist, this offering of two specimens is extraordinary. Technically, this coin is rarer than the 1796 Half Cent with pole. (\$15.00)
- 101 **1807.** G-1; **B 50 (R-2 — .20)**. The single variety. VF-20, the obverse weak as usual. Slight handling defects. **1808.** G-2; **B 52: 2-A (R-2 — .30)**. VG-7, but appears to have been cleaned. **1808/07.** G-1; **B 51: 1-A (R-4 — \$1.00)**. VG-10. In spite of a few obverse corrosion spots, and a light reverse edge bruise, this is an acceptable example of a well known type coin that lists in Good at \$7.50 and Fine at \$20.00. 3 Pcs.
- 102 **1809/06.** G-5; **B 53: 1-A (R-3 — .25)**. The 9 was first punched upside down, and then recut properly. VF-35. (Lists in the Std. Cat. at \$10.00 so.) **1809.** G-4; **B 56: 4-C (R-3 — .15)**. EF-40. Also, 1809. G-2; **B 57: 5-D (R-2 — .12½)**. The rare sub-variety with a pronounced rim break from over the head to opposite the 10th star. Abt. Uncirculated-50. Lustrous light golden brown. 3 Pcs.
- 103 **1810.** G-1; **B 58 (R-3 — .40)**. Only one variety of this date. Very Fine-25. Weakly struck upon the right hand side, as usual. A nice coin to own. (\$10.00)
- 104 **1811.** G-1; **B 59: 1-A (R-4 — \$1.25)**. Almost VG-7, but lightly pitted upon the obverse. Also, 1810. Better than F-15. The stars at right are fairly strong, the impression being above average. 2 Pcs.

- 105 1811. G-2; **B 60: 2-A (R-5 — \$2.50)**. Abt. VG-7, the variety with a very heavy break on the obverse rim at the first four stars, and with bad sinking on the reverse. The surface has a slight roughness, and we note, among other defects, a light edge bruise at the base of the obverse. Also, 1810. At least Fine-15, but somewhat imperfect. The obverse appears to have been cleaned, and there are a few edge defects upon both sides. Very rare and scarce. 2 Pcs.
- 106 1825. G-1; **B 62 (R-2 — .15)**. Mint state-65. Iridescent upon the obverse, but with considerable reverse red. There are a few rim imperfections due to striking. Also, 1825. G-2; **B 63 (R-2 — .25)**. Strictly Fine-15. Both varieties of this date. 2 Pcs.
- 107 1826. G-1; **B 64 (R-2 — .15)**. AU-55. Iridescent coloring. In addition, 1825. G-1; B 62 and 1828. G-1; B 67, the last with thirteen stars. AU-50, but with two minute obverse pin point nicks, and VF-35, but with a few rim flaws. 3 Pcs.
- 108 1828. G-2; **B 66 (R-2 — .15)**, G-1; **B 67 (R-1 — .12½)** and G-3; **B 68 (R-2 — .20)**, the last with twelve stars, and the two former with thirteen. Also, 1829. G-1; **B 69 (R-1 — .15)**. VF-30, EF-40, VF-30 though slightly bent, and EF-45, the obverse cleaned. 4 Pcs.
- 109 1832. G-1 and G-2; 1833; 1834; 1835. G-1 and G-2. **B 73 through B 79, lacking B 75**. Both 1832's are R-2, the others R-1. Basal values average .10. Very Good (1) to Ex. Fine. Mostly the best. 6 Pcs.
- 110 1849 to 1856. Set of the Late date varieties intended for circulation, excepting 1857. (Only one variety of each date, 1849-57, was struck for circulation.) All are Very Fine to Ex. Fine, mainly with evidence of cleaning, except the 1851. The latter is MS-65, the leaves partly flat on the reverse, but with a beautiful red and iridescent surface. A nice lot, superior to most. 7 Pcs.
- 111 1857. The last year of issue. MS-60. Mostly red, but not fully brilliant. Also, 1837. HALF CENT WORTH OF PURE COPPER. Low 49. Very Fine. Well worth \$10.00 or more. 2 Pcs.
- 112 1803-08. The balance of the Draped Busts in the collection. Includes a Good 1804 Plain 4, Stems; a Very Good 1804 G-6 (R-5); a Fine Spiked chin of 1804; and a Good 1808/07. Abt. Good to Fine or better. A few are mutilated, several are mishandled. All are enveloped and described. 31 Pcs.
- 113 1809-57. The duplicates of the Classic and Coronet Heads. We note three 1809/06's, 1810, an 1811 (Last two Abt. Good), plus four 1828's with twelve stars (Fine or better). Abt. Good to Ex. Fine. A few pieces are mishandled, but on the whole this lot is clean and desirable. Enveloped and described. Above average. 32 Pcs.

UNITED STATES SILVER AND GOLD COINS

The property of Earl M. Skinner, Teaneck, N. J.

- 153 **Silver Dollars.** 1798. B-3. Knob 9; curl does not touch 1. Rev. Large heraldic eagle, thirteen arrows, star distant from the eagle's beak. Strictly Fine, but somewhat unevenly struck. This variety is listed as Rarity 4 by Balender, but it is seldom offered. It was not in either the Lathrap or Rumbel collections, as cataloged in the recent A.N.A. sale. Very rare.
- 154 1799. B-10. First star appears small and thin. Rev. Five large berries. Abt. Very Fine. A few old and unimportant abrasion marks are noticeable upon Liberty's neck and throat. Well worth \$20.00.
- 155 **1836. Gobrecht dollar.** Liberty seated r., in plain field. C. GOBRECHT F. on base, date below. Rev. Flying eagle in a field of 26 stars. Plain edge. Fully Very Fine, though originally purchased as Extremely Fine. A remarkably clean and attractive specimen, almost completely free of the usual minor nicks and other defects. Currently catalogs at \$85.00, and is well worth that figure.
- 156 1860. Proof, almost fully brilliant. This coin shows some evidence of cleaning, but it is choice and desirable. Now catalogs at \$32.50.
- 157 1861. Proof. Not in full brilliancy, and somewhat dull in appearance. Lists at \$50.00. Rare.
- 158 1862. Brilliant Proof. A cleaned coin, but a decidedly sharp and attractive piece. Worth close to full catalog value of \$27.50.
- 159 1863. Brilliant Proof. Only 460 Proofs coined. Not a "Gem" example, but well above average. Equal to a specimen we recently sold at retail for \$33.50.
- 160 1864. Proof. A brilliant coin though cleaned. Few infinitesimal defects. Lists at \$27.50.
- 161 1865. Brilliant Proof. The last year of the type without the motto. A glittering, perfect beauty, and one of the nicest that we have seen. In great demand, and well worth its full catalog listing of \$35.00.

The Excessively Rare 1870 "S" Silver Dollar

- 162 **1870 "S"**. The mint letter S is very small and located high, rather close to the feather end protruding below the stem of the olive branch. Almost Very Fine, but repaired. Apparently, the obverse field was at one time engraved or inscribed. This impairment has long since been removed, extensive evidence of the work appearing in the field at both sides of the seated figure of Liberty. The reverse is comparatively clean and sharp, the only other defects being minor and common to circulated dollars of the period. One of the great rarities in the U.S. Silver series, being rarer than either the 1894 "S" Dime or the 1876 "CC" Twenty Cents. It is rarer than even the "original" or first reverse of the famous 1804 Silver Dollar, and is far more authentic. Lists at \$1,750.00 in Fine on page 110 of the 1953 Standard Catalog. **Plate II.**

Two 1870 Silver Dollar reverse dies were receipted for by the San Francisco Mint on May 28th of that year. However, no Silver Dollars were reserved for assay, an indication that a regular issue for circulation was not contemplated. It is believed that the coinage was only a specimen one, as far as the Three Dollar Gold piece, and was of exceedingly small size. Neither the \$3.00 nor the \$1.00 Silver were ever accounted for in the coinage reports.

From various coins we have seen of that time and part of the country, it is our belief that the piece described above was engraved for presentation at about the date of issue. Such a practice would have been particularly appropriate for a limited or "souvenir" emanation. The Skinner specimen appeared as lot #271 in the "World's Greatest Collection" sold by the Numismatic Gallery in 1945. At that time the coin was described as Very Fine, no mention being made of the obverse disfigurement. It realized \$1,650.00 and was purchased by back bidder #176. Without its owner's identity being disclosed during the interim, the piece was next offered in Hollinbeck's "Southern Sale" (95th Auction) on Feb. 28, 1951. In that catalog it was described under lot #1248, and was purchased by Mr. Skinner. We have good reason to believe that this piece was the example sold by William Hesslein, circa 1916, for \$1,600.00 against a reputed bid of \$2,000.00.

A. G. Heaton, in his "A Treatise on the Coinage of the U.S. Branch Mints" published in 1893, did not know of the existence of the 1870 "S" Silver Dollar, even though he acknowledged the coinage of the unknown 1873 "S" and had evidently seen the 1873 "CC" Dime without arrows. It has been claimed that as many as six specimens of the 1870 "S" exist. Our records cannot substantiate this information, a lesser number probably being known. The Neil example sold for \$1,500.00, while the Menjou piece brought \$1,675.00.

- 163 1878. The variety with seven feathers in the eagle's tail. Brilliant, but cleaned Proof. Genuine Proof impressions of this piece are really rare, and should not be influenced by the large number of first strikes that have recently appeared. Catalogs at \$35.00.
- 164 1878. The eight feather variety. Fully brilliant Proof. One of the brightest examples of this coin that we have seen. Unfortunately, there are a very few light rim nicks, particularly upon the reverse. Still above average, and well worth a good price. Cast \$23.50.
- 165 1878 "S", 79 "S", 82, 86 and 1892 "CC". The mintmarks are "Semi-Proofs" while the 1882 and 1886 are genuine Proofs. Both of the latter show brilliancy, but also display slight handling, and the 1886 has a severe reverse rim nick. All were purchased at good prices. 5 Pcs.
- 166 1878 "S", 78 "CC", 81 "S", 82 "S", 83 "O", 84 "O", 85 "S", 87 "S", 89 "S", 90 "O", 90 "S", 90 "CC", 91 "S", 91 "CC", 92 "CC", 94 "S", 96 "S", 97 "S", 1900 "O", 02 "S", 04, 21, 21 "S" and 1921 "D" (2). Mr. Skinner's collection of Uncirculated Morgan dollars. While many of these coins are not rare, they are above average, almost all being brilliant, picked pieces. Many list from \$3.50 to \$6.00; the 1892 "CC" catalogs at \$7.50 and the 1896 "S" at \$12.50. A splendid lot for the neophyte. Well worth \$65.00. 26 Pcs.

The Extremely Rare Half Eagle of 1929

- 204 **1929.** The last year of the Indian head type. Brilliant Uncirculated. A superb specimen with a bright, frosty mint surface. Like all Uncirculated late date Half Eagles, this piece shows slight indications of "bag handling," or the fine abrasion marks caused by coins coming into contact with each other while being shipped and handled, prior to their release for circulation. This example is one of the finest known, and is fully equal to the coin in the World's Greatest Collection which sold for \$475.00 in 1946. Whatever price this valuable item realizes today will be a bargain, as well as a splendid investment. It is considered one of the rarest Half Eagles, and a future really great rarity. **Plate II.**

It was only in recent years that the rarity of the 1929 Half Eagle was recognized or appreciated. In March, 1944, when it only cataloged for \$25.00, a specimen brought \$225.00 at auction. In December of the same year, 1944, another one realized \$375.00. B. Max Mehl sold the Geiss example for \$365.00 in February, 1947. The Dr. Green piece brought the same price in 1949. It must be remembered that not all of these coins were the equal of the choice specimen owned by Mr. Skinner.

- 205 **Eagles.** 1797. Large heraldic eagle. Very Fine. Not fully struck up on the obverse, as usual. Slight evidence of dirt upon the reverse which can be easily removed. Lists at \$100.00.

- 206 1850. Just about Fine.
- 207 1880. Very Fine, but with rim abrasion marks.
- 208 1880 "S". Almost Uncirculated. Lustrous and desirable.

- 214 1907. The last year of the Liberty head type. Abt. Ex. Fine.
- 215 1908 "D". The splendid design by St. Gaudens without the motto. Uncirculated, but with a few minute handling imperfections. Catalogs at \$40.00 so.
- 216 1932. The last year of regular issue. Uncirculated, and just about the equal of the preceding. A rather popular date.

- 218 1907 "S". The last year of the Liberty head type. Very Fine.

- 220 1924. Brilliant Uncirculated. A nice piece, but with the usual minor handling defects. Scarce.
- 221 1927. Extremely Fine and lustrous. Uncommon.

The scarce 1874, 75 and 1876 Nickel coins are all Fine, but the 1868 is scratched upon the obverse, and the 1876 has an attempted puncture above Liberty's head. The 1855 Trime has been replaced by a duplicate 1857, but there are two scarce 1851 "O's," one of which has a planchet defect near the rim upon both sides. The last are both Very Fine, and the 1859 is brilliant Uncirculated. The rest of the coins, including the Three Cents Nickel, can be graded from Good to Ex. Fine. 26 Pcs.

- 289 1876. Well tarnished Proof. Only 1,260 pieces struck. Currently valued at \$20.00.
- 290 **1877.** Proof. A choice example, mostly brilliant, but well tarnished upon the obverse. Very Rare and well worth a good price.

Contrary to the popular conception that 510 pieces were struck bearing this date, we can reveal that the total coinage consisted of only 350 specimens. While the 1877 Twenty Cent Piece will list at \$60.00 in the new, 1953 Standard Catalog, we feel it is far rarer and more desirable than the minor coins of this date which are valued at higher prices. As we observed in our January 26th sale, it would not surprise us to see this coin eventually retail for \$100.00.

- 291 **1878.** Brilliant Proof, but well tarnished. Almost Perfect. Now catalogs at \$45.00.
- 292 **Restrike Confederate Half Dollar. 1861.** Obv. Type of the regular U.S. issue. Rev. Confederate shield with Liberty cap above within wreath of grain and cotton. Legend, CONFEDERATE STATES OF AMERICA. HALF DOL. Reeded edge. The obverse is flattened, as usual, but the reverse is sharp and clear except for EDERATE of CONFEDERATE and STA of STATES which are almost obliterated due to poor striking. Rare, and in great demand. This specimen cost \$55.00.

- 293 **Hollow Locket.** 1878 "S". Trade dollar. By applying pressure at the word STATES, the reverse opens to reveal a cleverly made locket, in this instance, containing a photograph which could be removed. Abt. Very Fine. When closed, this piece appears to be just an ordinary coin. Highly interesting, and worthy of a good price.
- 294 **Leshner Dollar.** 1900. Obv. View of Colorado mining scene. Rev. Adoption of the seal of Colorado. 1.OZ. COIN SILVER; PRICE 1.25. This is the second design of the A. B. Bumstead type, without scrolls in the field at the sides of the State seal device. Zerbe #3. **No. 782.** Strictly Very Fine, but with a slight rim cut at the bottom of the obverse, and an edge nick at the top of the reverse. The large offering of these privately made octagonal pieces in the A.N.A. Convention sale averaged slightly less than \$60.00 each. In great demand.
- 295 **Mint Ingot.** Small San Francisco Mint Silver Bar or Ingot. Mint stamp at top. Numbered 1714. 999.5 FINE. 6 punched at bottom end. Weight (on reverse) 6.45 OZS. Ex. Fine.

- 302 Bolen-Edwards Mule. A combination of Bolen's Confederatio reverse with large stars, and his Higley obverse. Copper. Unlisted by Bolen; Kenney 14. Probably struck by Dr. Edwards, as the dies appear slightly defaced and partially restored. Unc., mostly red. Excessively rare.
- 303 Copy of the Sommer Islands Shilling by Dr. M. W. Dickeson. Brass. Kenney 1. Also, 1803. Brass counters resembling the Half Eagle (2) and Quarter Eagle by Kettle. Kurth 1 & 2. Abt. Unc., and Fine to V. Fine. One of the Kettle Half Eagle counters is slightly mishandled upon the obverse. Interesting. 4 Pcs.
- 304 The "Unknown" copy of the Clinton Cent. A struck replica, in Copper, manufactured by a person or persons unknown. The date and legends are larger than found upon the original, or even on a Bolen copy, and the bust of Clinton, as well as the New York arms, appear somewhat crude. Wgt., 10.26 Grams. Illustrated and described in the August, 1912 Numismatist by E. H. Adams, and in the Sept.-Oct., 1950 Coin Collectors Journal by Dick Kenney and the cataloger. Very Fine. Ex. Rare, the first specimen offered in many years.

- 322 1857. Very Fine.
- 323 **1857 "C"**. Abt. Very Fine. Struck upon a poor planchet displaying indications of granulation and other defects. The edges show signs of handling and a few microscopic nicks. In spite of its description, this coin is an acceptable example of a very rare mint mark. Cost \$36.50.

U. S. Three Dollar Gold Pieces

In the light of actual rarity, the Three Dollar piece has long been unappreciated. In only ten of the thirty-five years of continuous coinage did the mintage exceed 10,000 pieces. Many dates are far rarer than even the number struck implies, and bring but a fraction of their potential value.

- 337 1854. Extremely Fine. The first year of issue.
- 338 1854. Another. Very Fine. Minute nick in the left obverse field.
- 339 **1854 "D"**. Fine to V. Fine. Originally purchased as a strictly Very Fine coin. Outside of two or three microscopic rim nicks, this is an unusually clean example of a genuine rarity. Only 1,120 pieces were struck in 1854, the single year of coinage at Dahlonega. Cost \$70.00, several years ago.
- 340 1854 "O". Almost Very Fine. Like the last, a valuable "type" coin. The only year of coinage at New Orleans. Seldom found better. The Menjou example was only Fine, and the W.G.C. specimen the equal of the present piece.
- 341 1855. Brilliant Uncirculated. A nice coin with only slight signs of handling. Records to \$27.50.
- 342 1855 "S". Abt. Fine. Nice even wear. Only 6,600 pieces coined.
- 343 1856. Strictly Extremely Fine. Considerable Proof like surface.
- 344 1856 "S". Small S. Fine to Very Fine. A scarce variety, listing at \$22.50 in only Fine in the Guidebook.
- 345 1857. Extremely Fine. Lustrous. Lists at \$22.50 in only Very Fine.
- 346 1857 "S". Abt. Very Good. Nice even wear.
- 347 **1858**. Very Fine or better. Infinitesimal reverse edge nick. Equal to the Higgy, Grinnell, Waltman and Menjou specimens. This date was lacking in the Olsen collection, and the Col. Flanagan example was once mounted. Only 2,133 pieces coined. Well worth \$50.00.
- 348 1859. Strictly Ex. Fine. Appears to have been struck as a Proof.
- 349 1860. Very Fine. Only 7,155 pieces minted. Lists at \$25.00.
- 350 1860 "S". Not quite Very Fine. Only 7,000 pieces struck.
- 351 1861. Very Fine. Only 6,072 pieces struck.
- 352 1862. Very Fine. This coin was apparently struck as a Proof. Only 5,785 minted.
- 353 1863. Abt. Very Fine. Few slight rim defects. Only 5,039 minted. A \$25.00 coin.
- 354 1864. Close to V. Fine. As only 2,680 pieces were struck, this is definitely an underrated coin. A "buy" at \$25.00.
- 355 **1865**. Almost Very Fine. Unimportant indications of handling. Another Proof that found its way into circulation. A real rarity with a total coinage of only 1,165 pieces. Cost \$46.00 in 1946.
- 356 1866. Abt. Very Fine. Only 4,030 minted. Lists at \$25.00.
- 357 1867. Extremely Fine. Full mint bloom. Only 2,650 minted. This piece is well worth \$35.00.
- 358 1868. Impaired Proof. Only twenty-five Proofs struck out of a total coinage of 4,875 pieces.
- 359 1868. Another. Extremely Fine. Lustrous and choice.
- 360 1869. Extremely Fine, formerly a Proof. We notice a slight abrasion on the right obverse edge. Only 2,525 coined in all.
- 361 1870. Fine to Very Fine. Another uncommon date, as only 3,535 were coined.
- 362 1871. Abt. Very Fine. A really underrated item. Only 1,330 pieces struck. Far rarer than commonly known.
- 363 **1872. Proof**. Not a fully brilliant "Gem," but a nice coin. Only thirty Proofs struck out of a total coinage of 2,030 pieces. The W.G.C. specimen sold for \$85.00 in 1946. **Plate II.**
- 364 1874. Abt. Uncirculated. Lustrous.
- 365 **1877**. Very Fine, struck as a Proof. In spite of three slight digs in the left obverse field, this is a desirable example of a really rare date. The Menjou specimen was in similar condition, but had a loop removed. **Plate II.**
- 366 1878. Very Fine or better.
- 367 1879. V. Fine to Ex. Fine. Only 3,030 pieces struck.
- 368 **1880**. Brilliant Semi-Proof or first strike. Purchased by the previous owner as a Proof. An uncommonly rare date, as only 1,036 examples were struck. A \$50.00 coin.
- 369 **1881**. Very Fine. Worth well in excess of catalog. Only 550 pieces struck.
- 370 1882. Another first strike described as a Proof. Well worth \$40.00, as only 1,540 were minted.
- 371 1883. Very Fine. Originally a Proof. Only 940 struck in all.
- 372 1884. Extremely Fine. Only 1,106 pieces struck.
- 373 1885. Impaired Proof. Only 910 struck in all. \$42.50 was paid for this coin.

- 374 1886. Very Fine to Extremely Fine. Only 1,142 pieces struck.
 375 1887. Brilliant Proof. Only 160 Proofs struck. Lists at \$50.00 in the Guidebook.
 376 1888. Abt. Extremely Fine. Only 5,291 minted. Cost \$25.50.
 377 1889. Very Fine. Only 2,429 coined in this, the last year of issue. Another \$25.00 coin.
 378 **Half Eagles.** 1908. Indian head. Abt. Very Fine.
 379 1909. Fine to V. Fine.
 380 1909 "D". Very Fine.
 381 1910. Strictly Very Fine.
 382 1911. Abt. Very Fine.
 383 1911. Another. Fine to V. Fine.
 384 1914 "S". Fine to V. Fine. Decidedly uncommon.
 385 **Eagles. 1804.** Fine to Very Fine. Slightest evidence of file marks upon the obverse. Not a particularly sharp coin, but a decidedly scarce one. The last year of the turban head. In great demand.
 386 1881. Very Fine.
 387 1881. Another. Very Fine.
 388 1881. Another. Abt. Very Fine.
 389 1881 "S". Strictly Very Fine.
 390 1882. Extremely Fine and lustrous.
 391 1893. Very Fine or better.
 392 1894. Very Fine. Slight dirt marks upon the obverse.
 393 1898. Almost Very Fine.
 394 1899 "S". Fine to Very Fine.
 395 1899 "S". Another. Almost Fine.
 396 1906 "D". Very Fine. The first year of issue from this mint.
 397 1907. Indian head. The common variety without periods. V. Good to Fine.

THE JOHN PAWLING COLLECTION

U. S. Large Cents

- 398 **1793.** Crosby 1-A. (Sheldon 1) R-4. The famous Chain AMERI. Good-4. As usual, the obverse is very weak, and the date is hardly visible. The reverse is strictly Very Good. There are a few surface defects, and the edges are bruised, particularly upon the reverse. An acceptable example of a popular coin. (\$35.00)
 399 1793. C 3-C; (S-3) R-3. Chain, AMERICA. Very Fair. The date is well worn, and both sides are impaired, the obverse with several light scratches. Also, C 6-F; (S-5) R-3. Wreath type; Large LIBERTY and date. Abt. V. Fair. Corroded in spots and quite worn, but more than half legible. Valued at \$25.00. 2 Pcs.
 400 1793. C 9-G; (S-8) R-3. Wreath type; The Horizontal Stem. Good-5. An evenly worn cent, and except for a minor obverse edge bruise, or a microscopic nick or two, a comparatively clean coin. The date is clear and sharp. (\$25.00)
 401 1793. C 9-G. Another. Good-4. Almost the equal of the preceding, but with a few rim flaws. Worn, mostly upon the reverse, but an acceptable piece. (\$20.00)
 402 1793. C 11-J; (S-11c) R-3. Wreath type; Lettered edge, single leaf after DOLLAR. VF-20. Unfortunately, this nicely struck and evenly centered cent has been scratched upon the obverse in several places. There are also a few rim defects, but all in all, a desirable and valuable "Penny." (\$60.00)
 403 1793. C 11-J; (S-11c). Another. Only Abt. Good, but the date, as well as the rest of the coin, is almost fully discernible. There is a small cut near the center of the reverse, together with a few other unimportant imperfections. (\$15.00)
 404 **1794.** Hays 4; (S-17) R-6. Head of 1793; Wide, Straight Date. Good-5. Almost everything is clear, though the planchet is rather defective, a common occurrence with H-4's. In spite of an old and light scratch near the bust point, the obverse is far superior to the reverse, which has a severe flaw at F of OF. A variety that is seldom offered, and even more seldom seen in Fine. (\$37.50)
 405 1794. Hays 10; (S-51) R-5. Maris's Forlorn. A choice example of the extremely rare state with broken obverse die. Fine-12. Both sides have a nice smooth surface, although the reverse is not nearly as strong as the obverse. We note a very few light and unimportant nicks. The A.N.S. example of this variety with the single die break is quite worn. Very seldom encountered. (\$35.00)

- 406 1794. Hays 10. Another. This piece would be VG-7, or even better, but it has been mishandled. There are several small nicks and scratches, particularly in the right obverse field, and the edge displays two or three light bruises. Hardly as bad as it sounds. Decidedly rare. (\$15.00)
- 407 1794. Hays 13; (S-55) R-3. The Big Berries variety. VG-7. Unfortunately, the surface is slightly rough, and we note a small edge bruise upon the reverse. (\$10.00)
- 408 1794. Hays 15; (S-59) R-4. The Many Haired. This cent would have strong claims to VF-20, were it not for a film of light corrosion which mainly impairs the obverse. In addition, there are a few other defects, mostly minor. Conservatively, we would call this piece VG-10. (\$20.00)
- 409 1794. Hays 20; (S-42) R-5. ("Possibly R-6"-Sheldon) Abrupt Hair; OF weak. Fine-12. Regardless of a very light mark in the left abverse field, this cain is unusually clean. Dark brown color. Well centered and mostly bald, considering the fact that the weakness at upper reverse shows even on the finest specimens such as the Downing (EF-40) cain. A desirable addition to any collection. (\$35.00)
- 410 1794. Hays 23; (S-28) R-3. Maris's "Ornate." VG-8 or better, but sadly mistreated. The reverse is weak as usual, and both sides, as well as the edge, show spots of corrosion. Also, there is a long scratch across the lower obverse, and a heavy nick at L in LIBERTY. (7.50)
- 411 1794. **Hays 28; (S-34) R-7.** The "Venus Marina" obverse, combined with the reverse having a single berry left of baw. A sharply struck coin that would be F-12, were it not so badly mishandled. The obverse, in particular, is covered with small nicks and digs, and the rims are bruised. While the reverse is exceptionally strong (except at OF), it has its share of pit marks and flaws. Medium light brown color. Of the eleven known examples, three are in the A.N.S., and only two exceed VG-7, one of these being the Dr. French cent, now in the collection of the A.N.S. The specimen at hand is believed to be the fourth finest extant, following close behind the Hines-Downing piece which was very similar, and which realized \$115.00 in the 1952 A.N.A. Convention sale. Superior to the Macallister example which was Good-6, and sold for \$85.00 in 1945. (\$100.00)
- 412 1794. Hays 54; (S-67) R-3. Head of 1795; The Roman Plicae. Fine-12. Well centered and evenly struck. Medium brown color. A nice cain, free from any serious damage or maltreatment. In great demand as a "type" cent. (\$17.50)
- 413 1794. **UNIQUE NEW VARIETY—Unlisted and Unpublished. (S NC-5) R-8. Obverse 19 as on Hays 33 (S-44); cracked as on most of the Hays 33's. Reverse T as on Hays 47 (S-45); injured as on all known impressions from that die.** Fair. Almost all of the obverse can be made out, even though the beginning of LIBERTY and the 4 in date are weak. There is an edge bruise to the left of the cap, a few light surface bruises, and two or three old digs at the date. The reverse is well worn, as only half of the inscription and detail can be made out. There are six slight nicks, the most prominent of which is between the N's in ONE and CENT. Unknown to Maris, Frossard, Proskey, Doughty, Hays, Gilbert, Chapman, Macallister, Downing or any other authority. **Unique. Value speculative.**
- This coin has been examined by Dr. Sheldon, and, like every other item sold by us, is unconditionally guaranteed.
- 414 Lot of nine 1794 Cents. We note a Hays 7 that is almost Fine, but with a decidedly rough surface. Also, two examples of Hays 43, one V. Good and the other Fine, but also rough. The remaining six pieces are Poor to Fair, and half of them are mutilated. 9 Pcs.
- 415 1796. Liberty Caps. S-84; (Gilbert D) R-3. Good-5. Few slight defects, including three obverse digs on the cap, and a slight edge bruise at point of bust. Also, S-87; (G-C) R-2. V. Good-10. Sharp nick at 6 of date, and touches of corrosion. Said to be worth over \$30.00. 2 Pcs.
- 416 1796. Liberty Caps. S-87. Another. Fully VG-10, but with several unimportant defects, particularly upon the obverse. We note a few minute pit marks, two or three light scratches, and an edge bruise or so. Still, cleaner than average. Also, S-88; (G-A) **R-6.** Good-4, the reverse well worn. The third rarest Cap, but with the usual obverse defects. Valued at over \$40.00. 2 Pcs.

- 417 1796. Liberty Caps. S-89; (G-K) R-4. Good-5, or better. There is a slight edge bruise at the bottom of the reverse, and the cent has been poorly cleaned. Also, S-91; (G-F) R-3. Abt. Gaad-5, the reverse worn, but the date mostly sharp. Few edge defects, plus an old and small gauge at the eye. Worth over \$25.00. 2 Pcs.
- 418 1796. Draped Bust. **S NC-4**; (Clapp-Newcomb 32) **R-8**. This cent was apparently Very Good-10 before it was horribly mistreated. The obverse is sharp, but it is covered with a multitude of minute nicks and digs. In addition, there are several deep cuts at the top of the head and a severe edge bruise above IB of LIBERTY. The reverse is somewhat better than the obverse, but there are several cuts at STATES and above. Due to the heavy obverse mishandling, the planchet has assumed a slight concave appearance. In spite of the description, this specimen is the second finest of the six known. The Warfield, Newcomb, Macallister and Janis pieces are all inferior, and range from Conditions 1 to 3. Extremely rare.
- 419 1796. Draped Bust. S-111; (G-29) R-5. Abt. Gaad-8. Mottled light and dark gray-brown. We cannot make out any of the obverse cracks described by Sheldon, who states that he has seen "but one example without any of the cracks mentioned." The obverse is almost Fine and sharp; the reverse is weakly struck, and has a minute pit mark above the last A in AMERICA. Similar to the Downing specimen, which we sold for \$19.00 in the 1952 A.N.A. Conventional sale. (\$25.00)
- 420 1797. S-120a; (CN-2) R-4. Wide date; The Reverse of 1796. Plain edge. Fine-12, but cleaned. There are a few touches of corrosion, mainly upon the obverse. A real "type" coin. Also, S-139; (CN-22) R-2. Very Good-10. A nice, clean example, but for several reverse edge nicks. Valued at \$22.50 or so. 2 Pcs.
- It is interesting to note that we sold the finest known example of S-139, a "Mint State-70," for \$240.00, while it was only estimated at \$85.00 in the Downing (A.N.A. sale) collection.
- 421 1797. S-123; (CN-6) R-5. Very Gaad-10. An acceptable cent, although it has the usual minor imperfections. This is the rarest of the varieties usually cataloged as from the Nichols hoard, but it is much more rare in Fine condition (i.e. from outside the famous hoard) than in the usual Mint State. (\$17.50)
- This particular specimen provides conclusive proof of the chronological order of the Nichols varieties. It has a perfect reverse die. S-119 (1796 G-15), with the same reverse die, always comes with a small rim break over TA, and usually over AT also, and later with other cracks. Therefore, S-119, despite the date, was certainly struck after the present coin, S-123. This must have been in November or December, 1797.
- 422 1797. S-136; (CN-19) R-4. Gaad-5. Slight obverse nick under Y of LIBERTY. Also, S-139. A duplicate. F-12. Evidence of corrosion, mainly upon the obverse. Nicely centered and struck. Uncolored pair. Worth \$17.50. 2 Pcs.
- 423 1797. S-140; (CN-23) R-3. Fairly late die stage. Abt. Fine-15, but with a few slight flaws, including an obverse pin point nick, and a minor edge bruise or so. (\$15.00)
- 424 1797. **S NC-5**; (CN-25) **R-8**. Next to lowest curl unfinished; Reverse W of 1796, six berries left. A unique die state, in that the obverse has an undescribed break through RTY, and the reverse breaks are somewhat advanced. The obverse is Gaad, but has been dented and flattened about the bust. The reverse appears almost Very Good, but it suffers slightly from the obverse mutilation. We note several other defects, including a few slight nicks and edge bruises, however, the cent is hardly as bad as our description implies. Medium brown color. This is the third example discovered, the other two being in the A.N.S. and the collection of Dr. Sheldon. Value speculative, but worth a good price.
- All three specimens of this 1797 variety came before the G-30 and G-12 of 1796, which has the same reverse in a more heavily broken state. While S NC-5 was discovered by A. C. Gies, full credit remains with Mr. Pawling for unearthing this unique broken die example.
- 425 1798/97. S-151; (Clapp 9) R-3. The second rarest overdate. Reverse breaks well advanced. Good-6. Lightly scratched upon the obverse, and with the usual incidental defects. Also, 1798. S-154; (C-12) R-4. The Imbedded 8. The coin press must have really had the "jitters" when this specimen was struck. It (like three or four others we have seen) is double struck quite strongly, and various areas of the two striking cover each other up and "cancel out," a weakness not due to wear but simply to the double striking. Abt. Fine-12. Lightly scratched in two or three spots, particularly between ONE and CENT upon the reverse. Lastly, S-167; (C-27) R-2. Die breaks well advanced. This piece would be VF-30, but there is some reverse corrosion, a pit mark at the bust point, and a very few other minor flaws. Valued as high as \$40.00. 3 Pcs.

- 426 1798. S-185; (C-45) R-3. The Second Low 9. VF-25. The obverse of this cent was cleaned long ago, and has begun to tone down. There are a very few infinitesimal pit marks upon the obverse, but this piece is far superior to either of the Downing specimens sold in the A.N.A. sale. (\$22.50)
- 427 1799/98. S-188; (C-1) R-4. Only Fair, but an acceptable space filler. Almost all of the obverse is distinct; LIBERTY is strong; the date is mostly discernible in a strong light, the bottom of the second 9 being visible. Unfortunately, the surface is rather rough with a spot or so of corrosion, and there are slight scratches at the bust point and fraction. (\$30.00)
- 428 1799. S-189; (C-2) R-3. This cent can be called Very Fair, in fact, the obverse is almost Good due to the sharpness of the date. All four numerals are bold and clean, but LIBERTY is well worn and just about obliterated. The lower reverse is weak as usual, but the "mint mark" chip is plainly visible upon this piece. There are a few very light obverse scratches that do not compromise the value of this specimen. (\$50.00)
- 429 1799. S-189. Another. On the obverse, the top of the date and the bottom of LIBERTY are strong, but that is all. The reverse is barely recognizable. Better than Poor, and a genuine 1799, the rarest date in the entire series. (\$20.00)
- 430 1800/799. S-193; (CN-4) R-6. The second overdate, supposedly over 1799. Abt. Fine-12. Dark brown color. A nice, clean appearing cent, in spite of a very few microscopic defects. Far above average, and a desirable and valuable type coin. (\$25.00)
- 431 1800. S-201; (CN-14) R-7. Thin, Unfinished Ciphers; Stemless Leaves Variety. Good-4. This is one of the few examples with an (unlisted) reverse die failure. The die buckled or sunk, obliterating most of the wreath and ONE CENT, while the peripheral legend remained strong. The obverse is weak at bust, curls and lower left, at the breaks and opposite the reverse sinking. While well worn, and with a minute nick or two, this piece is almost comparable with the Downing specimen which realized \$35.00 in the A.N.A. sale. Also, S-209; (CN-22) R-5. Close to VG-8, but slightly bent, and with a roughened surface that has been "improved" by a poor cleaning job. Even so, not too bad a cent. An acceptable pair, and well worth \$35.00. 2 Pcs.
- 432 1801. S-214; (Newcomb 2) R-6. Well advanced die failure over RTY. VG-8, but with some spots of corrosion on the right side of the obverse, as well as one or two other minor defects. Also, S-215; (N-3) R-6. A strong R-6, three times as rare as the S-214. This piece has a perfect obverse die, a quite rare state. Abt. Good-5, but LIBERTY and the corresponding part of the reverse weak. There are a few signs of mishandling, including a heavy cut at IC of AMERICA upon the reverse. Seldom seen in any condition. Said to be worth over \$30.00. 2 Pcs.
- 433 1801. S-219; (N-6) R-3. First 1 Pointed; Three Errors Reverse. About VG-10, though originally purchased as Fine. A clean and desirable cent, allowing for a small and unimportant edge nick. In great demand as a "type" coin. (\$15.00)
- 434 1801. S-220; (N-7) R-4. First 1 Pointed; Fraction 1/000. This is, though dark and rather rough, an excellent example of Newcomb 6^dD^d. Very Good-8. Few obverse nicks, particularly above R in LIBERTY and on the left edge. The Downing example, a VF-25 coin, sold in excess of its estimate. (\$17.50)
- 435 1801. S-222; (N-10) R-1. Blunt 1's. An early impression. Very Good-10. Dark brown, clean and desirable. Also, two examples of S-223; (N-11) R-1. Blunt 1's; Fraction 1/000. VG-10, but with a rough surface, and VG-8, the obverse with signs of corrosion. The first has a small obverse dig upon the bust, and the second a rim break over RT of LIBERTY. Both of the last are popular as types. 3 Pcs.
- 436 1802. S-228; (N-6) R-2. Fraction 1/000. Very Good-10. Slight reverse nick at TE of STATES, and a few rim defects upon both sides. Bold, and mostly clean. Also, S-229; (N-5) R-5. Low Leaning 8. Usual crack through ERTY, and on the reverse through AMERICA. Almost F-12, but pitted, and slightly mishandled, mainly upon the obverse. Worth about \$20.00. 2 Pcs.
- 437 1802. S NC-2; (N-7) R-8. Low Leaning 8. Reverse, ME in AMERICA joined at their feet. Crack in the obverse die through ERTY as on the A.N.S. coin. The obverse is better than Good, but it has been badly injured by a number of small, short cuts covering the lower right side of the bust, and extending from the top of the neck to below 02 of the date. The reverse is Very Good, but weak at the top, and suffering from a few edge bruises and corrosion, which are also evident upon the obverse. Also, the planchet appears slightly bent. This is the second known specimen, the only other one being in the collection of

the A.N.S. For all practical purposes, it should be considered unique. As with all coins of comparable rarity, the condition of this piece should not hinder its realizing a good price.

- 438 1802. S-230; (N-8) R-2 All of the described cracks are well advanced. VF-20. A nice cent, even considering a small obverse nick and pit mark. Medium brown color, with some reverse mottling. Also, S-239; (N-17) R-3. Without the usual obverse break. (Rare so.) VG-8, or better. The obverse has been cleaned, and there is an edge bruise above RT of LIBERTY. In addition, S-242; (N-20) R-2. Widest Fraction among 1802's. Better than F-15. Few slight edge imperfections and other defects. A nice coin. Valued at over \$25.00. 3 Pcs.
- 439 1803. S-245; (N-3) R-3. The Unicorn Variety. Fine-12, but with a few unimportant nicks and scratches. Also, S-247; (N-5) R-4. The Mumps Obverse; Short Fraction Bar. A slightly pitted and rough specimen of Newcomb 4^eE. VG-7. Well worth \$12.50. 2 Pcs.
- 440 1803. S-250; (N-8) R-4. The Farthest 1 and 3; Medium Fraction Bar. VG-8, the obverse surface lightly roughened. Also, S-251; (N-9) R-1. Obverse as last; Short Fraction Bar. A nice VF-30 cent, but with some edge and other damage, mainly in the form of a few small gouge marks. Medium to dark brown. Said to be worth \$17.50. 2 Pcs.
- 441 1803. S-256; (N-14) R-4. The rare terminal stage of these dies, Newcomb 10^bL^e. Slight scratches below and to left of the date, otherwise close to EF-40. Medium brown, and showing a spot or two of green edge corrosion. Superior to either of the two Downing examples. (\$30.00)
- 442 1803. S-256. Another. F-12, but with a dark, rough surface, particularly upon the reverse. Also, S-258; (N-16) R-1. Large Fraction; Break at D. Fine-12, but with indications of roughness, particularly upon the reverse Has been cleaned, but toned down again upon the obverse. Plus, S-260; (N-18) R-1. Very Fair. 3 Pcs.
- 443 1804. S-266; R-3. Broken obverse and reverse dies. This cent would be Good-6, but there is a slight roughness to the surface that is neither deep nor consistent. Also, we note two or three rim defects, and the reverse borders are well worn. However, the obverse is unusually bold, and the date clear and distinct. Worth a fair price. (\$42.50)
- 444 1804. Two others, one from perfect dies, and the second like the last. About Fair and Very Fair. In both cases, the dates can just about be made out. Excellent space fillers. 2 Pcs. (\$25.00)
- 445 1805. Two examples of S-269; (Clapp 3) R-1. The Pointed 1 variety. Fine-15, but with a few slight edge bruises, and Abt. Fine-12, but with a number of small nicks, and a minor scratch or two. Also, 1806. S-270; R-2. Strictly VG-10. A nice, clean coin, with nothing to mar it but a slight and unimportant edge bruise. The last alone is well worth \$15.00 to the date collector. 3 Pcs.
- 446 1805. S-269. Still another. Strictly Fine-15. In spite of a very few unimportant defects, and slight traces of reverse roughness, this sharp cent is well worth \$10.00. 1807/6. S-273; (C-1) R-1. Very Good-10. Two or three minute pit marks, and a few other small blemishes 2 Pcs.
- 447 1808. S-277; (C-1) R-2. The "Twelve Star" variety. The obverse is F-15, with a slight roughness; the reverse about VF-30, and clean. Steel color. A sharp example of this popular coin that lists at \$15.00 in only Fine in the Standard Catalog. (\$22.50)
- 448 1809. S-280; (C-1) R-2. VG-10. Nearly Fine, but with the usual array of minute nicks, digs, and scratches. Medium brown color. Popular as a date. (\$20.00)
- 448a 1809. S-280. Another. VG-10. Not as sharp as the preceding, but everything that the term "Very Good" implies. An attractive coin. (\$17.50)
- 449 1810/9. S-281; (C-1) R-1. Fine-15. Dark brown color. Clean and sharp. Decidedly above average. (\$10.00)
- 450 1811/10. S-286; (C-1) R-2. Very Good-8. Steel color. Few minute blemishes. Uncommon and in great demand. (\$15.00)
- 451 1810 S-282. Nearly F-12, but the edges are slightly impaired. 1810/9 S-281. Two pieces, Good to V. Good. Lastly, 1811/10 S-286. VG-8, but with a rough surface. The end of the early dates. 4 Pcs.
- 452 **Late Dates.** 1819 N-2, 1821 N-1 Compact date, 1822 N-2, N-3, N-4 and N-11, Wide and Compact dates. Average Fine. The 1821 would be Very Fine except for some obverse roughness. 6 Pcs.

- 453 1822. N-4 and N-11. The last with a wide date, the first R-3. Fine plus. Valued at \$8.50. 2 Pcs.
- 454 1825. N-4; Rarity 4. Large A's in legend. EF-45. Beautiful pink and blue iridescent surface. With a basal value of 50¢, this attractive and desirable cent should bring \$22.50.
- 455 1826/25. N-11½. An unlisted variety with a double profile. This is visible on tops of date, chest, lowest curl, lips and top of coronet; a few stars are double outlined. Fine to V. Fine, but with some signs of mishandling, together with traces of original color. 1828. N-12; Rarity 6 (closer to R-7). Abt. V. Good. The variety discovered by J. P. Young, and a great rarity. Not in the Newcomb collection. A really rare pair. 2 Pcs.
- 456 1830. N-3; R-4. Fine-12, but with a few obverse edge nicks. Also, 1835. N-8; R-3. The head of 1836. EF-40 plus. A beautiful cent, having almost the full mint color. One or two absolutely unimportant defects. Worth \$12.50. 2 Pcs.
- 457 1837. N-1. Plain hair cord; L. Letters. AU-50. Beautiful iridescent surface. Also, N-11; R-3. Beaded hair cord; S. Letters. MS-60. An Uncirculated "Gem." An excellent pair of type coins, the last unusually desirable. 2 Pcs.
- 458 1838. N-9; R-3 (closer to R-4). MS-60. An Uncirculated cent with traces of Proof lustre, but also with indications of tarnish. Also, 1839. N-11 Booby head. VF-35. Nice pair. 2 Pcs.
- 459 1844/81. N-2. Extremely Fine. Cleaned with Cyanide, but it should tone down within a few months. In great demand.
- 460 1844 N-5, 1845 N-10 and 1846 N-1 Small date. Ex. Fine to Uncirculated. The first is scarce, and the last exceptionally choice. 3 Pcs.
- 461 1847. Unlisted. The reverse shows countless die scratches slanting down to right within the wreath; others at AMERIC, and several other heavy lines at AM. This is the variety erroneously identified by Newcomb as his No. 36 on the box containing the Clapp coin, now in the A.N.S. This specimen is the only other we have seen. (We have never seen a coin answering Newcomb's description of his Na. 36.) Ex. Fine, but polished to resemble a Proof. Also, 1848. N-16. MS-60. A nicely toned Uncirculated cent. 2 Pcs.
- 462 1849. Unlisted. Similar to N-19, but the file marks in the die are much heavier and nearer to vertical; on the reverse, there are faint lines in the die between ONE CENT, criss-crossing the field. AU-50. Also, 1853 N-7 and what appears to be N-25, but which may be unlisted also. The first is close to VF-20, and the A.N.S. (Clapp) coin is no better, the variety being uncommonly rare. The last Uncirculated, but artificially toned. All three are undauntedly rare. 3 Pcs.
- 463 1850 N-9, 1851 N-2, and 1852 Uncertain, answering the description of N-4, except that the 1 touches the bust, and the reverse is without the usual crack found on N-4. All are Uncirculated and toned, but the last is unusually nice in spite of planchet flaws on the rims. 3 Pcs.
- 464 1854 N-14 (Scarce), 1855 N-4 Upright 5, 1855 N-9 Slanting 5 — Knob over ear, and 1856 N-14 Slanting 5. All are Uncirculated, the first 1855 having full mint red, and the 1856 artificial red. The 1855 "Knob variety" brought \$17.00 in red Uncirculated at the A.N.A. sale. 4 Pcs.
- 465 1856 N-7 Upright 5, and 1856 N-1 and N-14, both with Slanting 5's. Uncirculated, the last two showing traces of red. 3 Pcs.
- 466 1857 N-4. Small date variety. Slightly scarcer than the N-2. Strictly Very Fine.
- 467 **Remoinder of the Collection.** 1795 (9), 96 (12), 97 (8), 98 (15), 1800 (5), 01 (10), 02 (12), 03 (14), 05 (3), 06 (4), 07 (9), 08 (7), 09 (2), 10 (3), 11 (2), 12 (3), 13 (3) and 1814 (5). Poor to almost Fine, averaging about Good, but including many mutilated pieces. However, all are carefully enveloped and described, and a number of rare varieties and types are included. A collection formed with little concern for condition, but reflecting a high interest in die varieties. 126 Pcs.
- 468 Collection of Late Date Cents, 1816 to 1857, including 1821 (8), 23 (5), 26/5 (2), 43 Obv of 42 — Rev. of 44 (2), 43 Type of 44 (3), 44/81 and 1851/81 (3). Very Fair to Ex. Fine, averaging V. Good to Fine, but containing Uncirculated cents of 1818 and 1820. Only a comparatively few are mis-hondled or mutilated. A wide selection of die varieties are featured, all of which are carefully described and enveloped. 192 Pcs.

- 469 **Low 1.** Head of Jackson. Rev. THE BANK MUST PERISH. Copper. Abt. Very Fine. Attempted pin point puncture in the center of the reverse, and a few old scratches mainly about the bust upon the obverse. Very rare, classed as Rarity 6, the third highest degree of rarity according to Low. (\$25.00)
- 470 **Low 4.** Draped bust to right; **Low 5.** Military bust almost facing, the variety with small eagle and shield upon the reverse; **Low 6.** Ship sailing. FOR THE CONSTITUTION HURRA! All in Brass. Fine to V. Fine, and mostly clean. V. Scarce and rare. Cost \$22.00. 3 Pcs. (\$20.00)
- 471 **Low 7.** Liberty cap. THE GLORIOUS WHIG VICTORY OF 1834. Copper. Very Fine or better. Glossy dark brown color. A splendid example of an extremely rare token. **Plate II.** (\$35.00)
- 472 **Low 7a.** Similar to the last, but from a different obverse die. The rays in the glory are shorter, heavier and differently arranged. **Struck in White Metal.** V. Fine and lustrous, but with numerous minor dents grouped at the top of the coin upon both sides. An example of a most excessive rarity. **Plate II.** (\$100.00)
- The above described variety should have received a separate number from Low because of its fabric and composition, both entirely different from that of No. 7. We doubt if more than two or three examples are known, and none, to our knowledge, have appeared at auction sale since the publication of the standard work. The Dr. French, Jenks, Ten Eyck, Wilson and Dunham collections did not have it, in fact two of these did not even have the regular No. 7.
- 473 **Low 11.** Boar running, nose pointing to C. Rev. Bust of Jackson, broad shoulders. Brass. Very Fine, lightly silvered. Uncommonly rare. In the U.S. Coin Co. (Wayte Raymond) sale of Nov 9, 1915, an inferior example realized \$22.50. (\$18.50)

Jackass, first S in STEPS entirely beneath foreleg; **Low 23.** Female head, twelve stars around, large date below; **Low 28.** Handsome female head; **Low 49.** Half Cent token. V. Good (2), Ex. - 477 **Low 57.** Facing bust of Van Buren. Rev. SUB TREASURY & DEMOCRACY. Dog guarding safe. Brass. Very Fine and (as always) holed. Several unimportant signs of handling. Extremely rare, much more so than most collectors realize. From our thirty-seventh sale at \$52.50. **Plate II.** (60.00)
- 478 **Low 61.** Ship. WEBSTER CREDIT CURRENT. Rev. VAN BUREN METALLIC CURRENCY. 1837 below. Wrecked ship with curved deck. Falling topmast points to the top of peak, a flash of lightning points between them. V. Fine. Equal to the example in our thirty-seventh sale. V. Rare. (\$17.50)
- 479 **Low 72.** Francis L. Brigham. 1833 NEW BEDFORD. Border of pellets and inner circle on both obverse and reverse. The obverse die broken. Extremely Fine. A sharp, nicely struck example of this rarity. Attractive medium brown color. One of the finest known, and fully equal to the Dr. French specimen which realized \$41.00 in 1915. The Dunham piece was only Fine and brought \$38.50 in 1941. Extremely rare and valuable. **Plate II.** (\$40.00)
- 480 **Low 77.** Bucklin's Bookkeeping and Interest Tables. Long legends in several lines. 1834. Abt. Very Fine for this weakly struck variety, as almost all of the inscription shows. Light reddish brown. Extremely rare. The best that we have seen, and fully equal to the Dunham coin which sold for \$25.50. (\$22.50)
- 481 **Low 89.** Rude female head to r. TROY on coronet. Rev. BUCKLIN'S INTEREST TABLES 1835. Strictly Good for this poorly struck piece. A clean and desirable example. Dr. French's sold for \$31.00. Really rare, and seldom offered. (\$15.00)

A splendid and rare lot, seldom found so fine. No. 134 alone sold for \$21.00 in 1912 and \$25.50 in the Dunham sale. A highly desirable and seldom obtainable set. 5 Pcs. (\$22.50)
- 485 **Low 150.** J. GIBBS, MANUFACTURER. Strictly Very Fine. Decidedly rare, and a variety lacking in the Dr. French collection. The specimen in our thirty-seventh sale was equally choice, and sold for \$18.00 while estimated at \$12.50. (\$16.50)
- 486 **Low 155.** T. D. SEAMAN BUTCHER. Almost V. Fine. Dark brown color. In the U. S. Coin Co. sale of Nov. 9, 1915, an Abt. Unc. specimen brought \$31.00. (\$12.50)
- 487 **Low 156.** Type of Large Cent, but head facing to right. TROY on diadem. Rev. Starbuck & Son. Very Fine for this miserably struck coin. Glossy light brown surface. A splendid example, far superior to the piece sold in our thirty-seventh sale. V. Rare. (\$20.00)
- 488 **Low 162.** Bust of Van Buren. Rev. INDEPENDENT TREASURY. Eagle. Copper gilt. Extremely Fine, but with two or three minor edge nicks, the worse of which is upon the reverse. - 489 **Low 162.** Van Buren; **Low 163.** HOWELL WORKS GARDEN; **Low 180.** BERGEN IRON WORKS. All struck in Copper. A Fine or better lot. Scarce and rare. 3 Pcs. (\$13.50)
- 490 **Low 176.** GUSTIN & BLAKE. Teapot. A very crude token, the reverse die re-touched. Fine for the piece. Actually V. Fine, but as usual, the right side is not struck up. Really rare. A Very Good specimen sold for \$17.00 in 1915. (\$15.00)
- 491 **Low Nos. 20, 31, 32, 33, 34, 36, 38, 51, 76, 122 and 171.** All Uncirculated or nearly so. A splendid lot, seldom found so choice. 11 Pcs.

Four pages and twenty-two coins. 26 Pcs.

- 727 1917 "S". Uncirculated. Well struck and almost fully lustrous. Lists at \$35.00.

- 730 1918 "D". Uncirculated. Not fully struck up, but almost completely brilliant. A slight obverse surface scratch does not impair the value of this splendid specimen. Catalogs at \$45.00.
- 731 1919 "S". Almost fully brilliant Uncirculated. Rather weak upon the reverse, as usual, but still one of the choicest examples that we have seen. A mintmark that brought full catalog (\$40.00) in our 36th and 37th sales, and which now lists at \$50.00.
- 732 1919 "D". Brilliant Uncirculated. A superb, strangely struck piece, and worth a good price. The only flaw we can find is a microscopic tarnish spot in the upper left obverse field. Uncommonly rare.
- 733 1920 "S". Uncirculated. Weakly struck, but still better than either of the coins sold in our 36th and 37th sales. Lustrous and desirable. Now lists at \$45.00.
- 734 1920 "D". Brilliant Uncirculated. Far superior to the last three specimens that we have handled, the best of which sold for full catalog value. Rarer than the "S" mint coin.
- 735 1921 "S". Uncirculated. A splendid, evenly struck piece with almost full mint lustre. A top-grade example of a real rarity that now catalogs at \$45.00.
- 736 1921 "S". Another. Uncirculated. A really sharp and well struck coin that has unfortunately been cleaned. Should realize \$40.00.
- 737 1924 "S". Uncirculated. Rather poorly struck upon the reverse, but with almost full mint lustre. One of the great rarities in the series, not in our 37th sale nor the A.N.A. Auction. A coin that should bring \$50.00.
- 738 1924 "D". Choice Uncirculated. Almost fully brilliant, and comparatively well struck. Another rare "sleeper" that was not in our last two sales. Worth full catalog value of \$35.00..

Complete Set of Proof Three Cents Nickel

- 750 **1865 to 1889.** Complete set of Three Cents Nickel, including both the perfect and overdate of 1887, almost all in beautiful Proof condition. The very rare 1865 has a recut date, but appears to have one or two granular planchet flaws, together with a microscopic obverse rim defect. A few other pieces show minute indications of handling, and the 1887/86 has an imperfection or so in the left obverse field, plus a severe granular planchet defect upon the reverse. While the 1877 and 1878 are top-grade coins, the relatively common 1880 shows no appreciable Proof surface, and may even be an Uncirculated piece. All in all, this set is uniformly brilliant, and superior to a great many that we have seen. Mtd. in an attractive black lucite plastic holder. Valued at well over \$325.00. 26 Pcs.
- 751 Lot of well circulated Three Cent Nickel pieces, 1865 to 1881. We notice at least a dozen different dates, including the elusive 1874 (2), 1875 and 1876 (2). Very Fair to better than Fine, several banged up or mutilated. 131 Pcs.
- 752 **Large Cents.** 1793. Crosby 7-F. (S-6) R-3. Wreath type; buckled obverse. The obverse is Abt. Good with a slightly roughened surface; the reverse is Very Good or better. An acceptable cent, even though the date is only partly visible.
- 753 1799. Sheldon 189, R-3. The perfect date variety. Only Poor, but absolutely authentic. The date is mostly clear, and the coin is identifiable. Also, 1804. Sheldon 266, R-3. The variety with both obverse and reverse dies broken. A cent that would pass as Good if it were not for a small cluster of digs in the left obverse field, a light scratch from the right obverse edge, and three separate small digs upon the reverse. Two acceptable space-fillers. Worth \$25.00. 2 Pcs.
- 754 1798, S-176 (R-4), V. Good to Fine, but partly lacquered; 1802, S-233 (R-5), Abt. Fine; 1805, S-269 (The Pointed 1), V. Good to Fine. Interesting lot. 3 Pcs.

Poor to V. Good. Several attributed. 26 Pcs.
- 756 Three other Whitman boards (one No. 9001 and two No. 9002) containing various Large Cents from 1800 to 1857. Among other coins we note a Fine 1803 (S-260), several rare late dates, including two 1827's (A-6), 1828 (A-9), 1830 (A-8), 1831 (A-4), an 1843 Type of '44, and a Fine 1857 Large date. The condition of this lot runs from Fair to Abt. Ex. Fine, most of the coins being clean and acceptable. Many are expertly attributed. 78 Pcs.
- 757 Large lot of mixed Large Cents, 1794 to 1857. There are two 1794's (H-23 & H-39), an 1811 Perfect date, an 1857 Small date, and several other interesting items. Most of the lot is dated after 1840, even though there is a rather wide selection of dates. In addition, we note eight odd Half Cents and a solitary Two Cent piece. Poor to Very Fine, a few mutilated. In a blue cloth bag. 192 Pcs.

- 758 **Small Cents. 1856.** Flying Eagle cent. V. Good to Fine. The obverse field is lightly scratched in a small area beneath the eagle's breast. This mishandling continues down and partly obliterates the numerals 18 of the date. An acceptable example of this rare and popular coin.
- 759 Partial set of Small cents from 1857 to 1946 "D". The 1861 is Fine plus, and the 1864 Copper-Nickel is Ex. Fine. A 1864 Bronze is Red Unc., the '64 "L" is V. G. to Fine; the 1866 through 1876 dates average Abt. Good, while the 1877 is Very Good. The balance of the Indian cents are well circulated, the 1908 "S" is Very Fine, but the '09 "S" is lacking. The Lincoln cents are mostly used, but we note two Fine 1909 "S" VDBs, as well as a Very Good 1914 "D". All of the late dates after 1938 are Uncirculated, as are the 1931 "S", the 1932 "D" and the 1933 "D". An interesting lot mounted in a Raymond National Coin album No. 2. 169 Pcs.
- 760 **Lincoln Cent Sets.** Complete set from 1909 to 1948 "D", lacking only the 1948 "S". The rare 1909 "S" VDB and the 1914 "D" are Very Good, while all of the coins after 1930 are Uncirculated, including the uncommon 1931 set. Mtd. in a Popular album. 112 Pcs.
- 761 Complete set from 1909 to 1945 "D". The rare 1909 "S" VDB is strictly Fine, and the 1914 "D" is Very Good or better. A few dates are Uncirculated in addition to those dated after 1934. These include the 1910 "S", 20, 30 "S", 31 "S", 32 "D" and 1933 "D". Mtd. in a Whitman board. 105 Pcs.

- 763 Complete set from 1909 to 1934. Identical with the last, the 1909 "S" VDB being Red Unc., and the balance of the set used. Mtd. in a large Raymond page. 70 Pcs.
- 764 Complete set from 1909 to 1934. Similar to the two preceding, but the 1909 "S" VDB and the 1914 "D" are both V. Good. All of the late dates after 1930 are Uncirculated, the 1930 "S" being the only exception. Mtd. in a large Raymond page. 70 Pcs.

- 766 **Half Cents. 1793.** Gilbert 4. Die break on the right reverse rim. Obverse Abt. Good; reverse only Fair. Outside of one or two minor surface flaws, this is an evenly worn and acceptable coin.
- 767 1795. G-5. Plain edge; without pole to cap. Good or better. Well worth \$6.00 so.
- 768 **1796.** G-1. Pole to cap. While the reverse of this very rare coin is Poor, the obverse is just about Good. The legend, bust and date are all clear and plain. In spite of a slight granular roughness, the surface is unusually clean. Lists at \$150.00 in Good. Seldom offered.
- 769 1802/1800. G-1. Abt. Good, but somewhat battered. Everything is clear and readable, but the denomination upon the reverse is completely gone. An acceptable space filler for a coin that catalogs at \$20.00 in Good.

THE STANDARD CATALOG OF UNITED STATES COINS - Sixteenth Edition - 1953

Large 8 Vo. Cloth — Price \$5.00

The fifteenth edition of the Standard Catalog, bearing the date 1951, appeared in January of that year. During the last eighteen months, the editors conducted extensive research relative to various U.S. series, and at the same time an exhaustive survey of the present market. The result of their efforts is a greatly revised catalog, considerably larger than former editions, and containing information, prices, and data, much of which has never before been published.

The Early American Series, up to and including the 1773-74 Virginia coinage, has been entirely rewritten. The Massachusetts Silver coins have been arranged by types, accurately priced, and authoritatively attributed to the recognized references. The Lord Baltimore and Franco-American listings have also been revamped, all known varieties being included. The entire Rosa Americana coinage is broken down according to types, and almost all of the Patterns are illustrated for the first time, and where possible, valuations have been given. In addition, the early Mint issues of 1792 are now more highly specialized than in previous editions.

Many new descriptions and illustrations have been added to the Half Cent and Large Cent sections, and the riddle of the "rare" Half Cents (1831-36, 40 to 49, and 1852) is clearly explained.

All of the Proof coins formerly listed with each separate series have now been correctly placed in a section of their own. This eliminates confusion, and permits the gradual establishment of a true ratio of value between Proofs and Uncirculated coins. The Proof listings commence with 1855, the Silver Dollars excepted, and include accurate records of the number struck, wherever known.

The Restrike section has been completely altered, and now includes all of the Half Cents, Silver Dollars, and other coins, heretofore considered contemporary. Prices, in many cases, are included. A complete listing of the Confederate coinage is also given, plus information regarding coins by the C.S.A. from regular U.S. dies.

While numerous other changes and additions have also been made, the serious collector and dealer alike will particularly appreciate the completely new introductions and notes to be found at the beginning and end of each section. The entire U.S. series has been methodically appraised from a price viewpoint, and changes made to accurately reflect current market values. Increases in some lines are so pronounced, that no one interested in numismatics can afford to be without this standard of the trade.
